

Be Confident About Your Growth in Motion

Get connected to VisioNize® Lab Suite

How can you ensure optimal cell growth conditions?

The demands in cell culture labs have increased and become more complex. This is especially true for process standardization and documentation, e.g. to increase reproducibility of results and prove constant growth conditions in audits

and publications. Monitor your biological shakers from anywhere with VisioNize Lab Suite and track all related device parameters*, such as temperature, speed as well as remaining program runtime.

*Depending on your type of instrument

Real-Time Monitoring

Monitor your shakers from anywhere and track parameters, e.g. temperature, speed, speed timer, photosynthetic light, program status

Instant Notifications

Receive alarm and event notifications, e.g. user interventions or imbalance errors to address issues quickly

Device Connectivity

Connect and monitor all your shakers including 3rd party with VisioNize sense monitoring kit*

Easy Data Access

Export parameter, event data and any user interactions

Alarm Management

Track all alarm acknowledgements with time-stamped data logs

Response-Based Alarm Escalation

Define escalation schemes to individual or multiple recipient groups based on lab presence

Task Management

Plan and assign device-related tasks, e.g. chamber cleaning to ensure optimal device performance and cell growth

Protecting your Samples

Ensure the safety of your samples 24/7

* Note: Available for North America and Europe.

Secure your samples with VisioNize Lab Suite for free!
